Towing Doesn't Have to be a Drag™

Chances are you've seen us on the road. At Blue Ox, we design and manufacture the best towing products in the industry. But don't just take our word for it; look around. You'll find us on highways, in campgrounds, and wherever people journey through life in the great outdoors.

A fourth-generation family-owned business since 1925, Blue Ox has manufactured our products in Pender, Nebraska. We take pride in our innovative offerings and exceptional customer service and training. Blue Ox provides solutions for everything you want to tow, from award-winning tow bars and innovative baseplates to a complete line of sway control and weight-distributing hitches, fifth-wheel hitches, ball mounts, custom receiver hitches, and accessories for every category.

With state-of-the-art automation and engineering, intuitive designs, and straightforward installations, our towing solutions empower seasoned adventurers and newcomers alike. Our leading-edge E-coating paint line exemplifies our commitment to excellence, setting a new industry standard for durability and finish.

We create all our products to make towing more accessible so you can focus on the road ahead, not what's behind you.

Flat Towing

What Do You Need to Flat Tow?

Baseplate:

A baseplate is a semi-permanent bracket installed to the front of a vehicle where a tow bar can be connected. Baseplates are engineered to transfer the stress of towing and braking more evenly. This is important when flat towing, aka towing with all four wheels on the ground, so that your towed vehicle does not sustain damage.

Tow Bar:

Tow bars create a secure connection between a towing vehicle and a towed vehicle, allowing the towed vehicle to be pulled behind without the need for a trailer. They use arms that extend and pivot, adapting to turns and movements.

Flat Tow Brake:

Also known as a “dinghy towing brake,” a flat tow brake system is a device that applies the brakes of the dinghy based on an input from the towing vehicle due to a braking event. The tow brake goes into action as soon as the brake receives that input. Another way for the brakes to engage is to use the remote to engage the brakes.

Accessory Kit:

Blue Ox Accessory Kits contain the accessories you need including locks that secure your tow bar to the vehicle baseplate and the receiver hitch. An immobilizer to prevent the tow bar from rattling in the motorhome’s receiver hitch. A tow bar cover is included to protect your tow bar when it is stored on the back of the motorhome. A 7 to 6 electrical cable is included to transfer power from the motorhome to the towed vehicle’s lights while towing.

Wiring Kit:

Blue Ox offers a wide range of wiring kits to power the lights on your towed vehicle while towing: Traditional Bulb & Socket kits; Kits with LED lights; Kits with diodes; EZ-Light wiring kits that install in minutes.

Fuse Bypass Switches:

Stop pulling fuses. Disconnect with the flip of a switch. Available in four (5) different models(see application guide for fit information). Provides a safe alternative to the constant removal and reinstallation of the fuse when changing from the towed mode to the driving mode.

Drop Receivers:

Lowers or raises the receiver connection to allow the tow bar to be level when towing. The receiver end of the tow bar should never be more than 3 inches higher than the baseplate attachment points. Available for 2” and 2-1/2” receivers.

Premium Tow Bars

- Patented non-binding latches quickly disconnect, even in rugged terrain.
- Advanced E-Coat + Powder Coat for superior durability.
- Offset triple lugs for easy attachment to the baseplate.
- Rubber boots protect the tow bar from dirt and debris.
- No centering pin, easy to stow and store.
- Safety cables included.
- 3-year warranty.

Apollo

Dark Gray Sparkle e-coat + powder coat.

Patriot Brake

Features

- New smaller profile, fits more towed vehicles (8 X 7.5 X 11.5 vs 9 X 10 X 12).
- New lighter design (6.2lbs vs 9.5lbs.).
- Faster extension of the braking action.
- Electric, self-contained.
- Checks brake pressure to ensure proper setup.
- No tank to drain, no pumps or hoses to connect.
- In-cab controller monitors the brake & allows manual input.
- Works with hybrids.

Weight Distributing

How Does Blue Ox Sway Prevention Work?

Blue Ox Weight Distributing hitch heads are designed with integrated positive caster working in tandem with loaded spring bars.

Just like the steering wheel in your car or truck returns to center after you turn a corner, our hitch head keeps the trailer centered.

Positive Caster: Caster is the measure of how far forward or behind the steering axis is to the vertical axis, viewed from the side. This is measured by drawing a line between the top and bottom pivot points of the front upright. The angle between the drawn line and vertical is the caster angle.

If the line slopes towards the rear of the vehicle, then you have positive caster. Positive caster increases the lean of the tire when the vehicle is cornering, while returning it to an upright position when driving straight ahead.

SwayPro and TrackPro hitch heads employ positive caster, constantly pushing the trailer to the center of the towed vehicle.

True Vertical

Pivot Angle

SwayPro's spring bars act as a suspension between the tow vehicle and the trailer.

Weight Distribution & Integrated Sway Control

Our Weight Distribution Hitches prevent uneven tire wear on vehicles and trailers, evenly distributing the weight of your payload to level out your ride.

SwayPro & TrackPro feature built-in sway control rather than relying on separate add-ons, making them simpler and cleaner to use. Castor built into the hitch head, working in conjunction with spring bars that flex and bow (unlike traditional systems) augment the suspensions of the tow vehicle, loading up and nudging the trailer back to center.

Easy Installation, Adjustment & Use

The head pitch is set, so there is no messing or guessing with washers. Spring Bars can be swapped out (maintaining the existing shank and head) to adjust for changing tongue weights. Backup without disconnecting. Multiple shank, head, and bar configurations are available. Grease zerks in the head make maintenance simple and easy.

Robust Construction & Finish

Solid steel components, protective industry-leading e-coat paint + powder coat finish for durability, and proven engineering deliver a long service life.

Smooth, Stable Ride

Weight is distributed evenly across axles to minimize trailer bounce and "porpoising," improving driver control and comfort in all types of weather and driving conditions.

Brand Reliability & Support

Blue Ox's reputation for customer service, comprehensive limited lifetime warranties, and replacement part availability instill confidence.

SwayPro WD Hitch

Features

- Caster in the hitch head constantly centers the trailer.
- Spring bars augment the suspensions of the tow vehicle & trailer.
- Textured Bronze epoxy advanced E-Coat + Powder Coat for superior durability.
- Rotating latches with clamp-on brackets for quick and easy setup.
- Noise-free sway prevention never stops working, even in rain or snow.
- Standard Tongue Weights Available: 350, 550, 750, 1000, 1500, 2000 (2.5" Shank).

7-Hole Shank Kits

BX#	Features
BXW0350	0-350 lbs. Tongue Weight, 2-5/16" Ball, Clamp-on Latches
BXW0550	351-550 lbs. Tongue Weight, 2-5/16" Ball, Clamp-on Latches
BXW0750	551-750 lbs. Tongue Weight, 2-5/16" Ball, Clamp-on Latches
BXW1000	751-1000 lbs. Tongue Weight, 2-5/16" Ball, Clamp-on Latches
BXW1500	1001-1500 lbs., Tongue Weight, 2-5/16" Ball, Clamp-on Latches

9-Hole Shank Kits & 11-Hole Shank Kits & Underslung Kits Available

TrackPro WD Hitch

Features

Caster in the hitch head constantly centers the trailer.

Spring bars augment the suspensions of the tow vehicle & trailer.

Rigid L-Brackets provide additional points of sway controlling friction.

Standard Tongue Weights Available: 600, 800, 1000, 1300 (2-5/16" Ball).

Advanced E-Coat + Powder Coat for superior durability.

7-Hole Shank Kits

BX#	Features
BXW0650	400-600 lbs. Tongue Weight, 2-5/16" Ball, Standard L-Brackets
BXW0850	601-800 lbs. Tongue Weight 2-5/16" Ball, Standard L-Brackets
BXW1050	801-1000 lbs. Tongue Weight, 2-5/16" Ball, Standard L-Brackets
BXW1350	1001-1300 lbs. Tongue Weight, 2-5/16" Ball, Standard L-Brackets

9-Hole Shank Kits & 11-Hole Shank Kits & Underslung Kits Available

2-Point WD Hitch

Features

- Round spring bars flex for a controlled ride.
- Steel-on-steel friction minimizes sway.
- L-Brackets keep spring bars in place.
- Standard Tongue Weights Available: 600, 800, & 1200 (2-5/16" Ball).

6-Hole Shank Kits

BX#	Features
BXW0675	400-600 lbs. Tongue Weight, 2-5/16" Ball, 2 Hole Mounting Plate
BXW0875	600-800 lbs. Tongue Weight, 2-5/16" Ball, 2 Hole Mounting Plate
BXW1275	800-1200 lbs Tongue Weight, 2-5/16" Ball, 2 Hole Mounting Plate

2-Point Universal Fit Kits

BX#	Features
BXW0673	400-600 lbs. Tongue Weight, 2-5/16" Ball, 4 Hole Mounting Plate
BXW0873	600-800 lbs. Tongue Weight, 2-5/16" Ball, 4 Hole Mounting Plate
BXW1273	800-1200 lbs. Tongue Weight, 2-5/16" Ball, 4 Hole Mounting Plate

BX88445	Camper Leveler Chock, Single

Features

- Easily levels your trailer
- Trailers up to 35K & Tire sizes up to 32"
- Adjust to any height between 1/2" and 4"Rubber pads for extra grip on smooth surfaces.
- Limited Lifetime Warranty

Accessories

BX#	Features
BX88446	Camper Leveler Rubber Sheet
BX88447	Camper Leveler Ruibber Sheet

5th Wheel

5th Wheel Towing

Fifth wheel towing offers several distinct advantages, especially for those who prioritize stability, towing capacity, and comfort during travel. One of the primary benefits is enhanced stability. Because fifth wheel hitches mount directly over the rear axle of a truck bed, they distribute weight more evenly and reduce sway. This positioning gives the tow vehicle better control, especially during turns and in windy conditions.

Fifth wheel setups can typically handle heavier loads, ideal for towing large RVs, toy haulers, or horse trailers. Trucks equipped with a fifth wheel hitch can often tow more than those using a conventional ball hitch, making them a popular choice for full-time RVers or those hauling heavy cargo.

Fifth wheel trailers often feature multi-level floor plans, with raised forward sections that create separate sleeping quarters or living areas. This layout can feel more like a home on wheels, offering greater comfort and privacy for extended trips. With the added stability, users also enjoy a smoother ride that protects the trailer's interior from excessive jostling.

Testing Standards: All of our hitches are tested to the industry standard SAE J2638.

Connection: Our 5th Wheel hitches have a funnel-shaped head that guides the kingpin into place, significantly reducing the risk of false hookups & trailer drops.

True 360° nesting of the kingpin. No need for extra kingpin adapters.

Dual Articulating: Front to back, side to side.

Adjustable Height: we have added height adjustments 17", 18", and 19" (3" height adjustments) to account for the various gooseneck hitch configurations, pinbox heights, and bed configurations. The head height adjusts with 4 bolts.

Application: Connects to 2-5/16" gooseneck ball or bed rails.

Lightweight: Unlike conventional 5th wheel hitches, we designed ours in two sturdy pieces so you can reclaim your truck bed when you need to remove the hitch quickly and easily.

Finish: Advanced E-Coat + Powder Coat for superior durability.

5th Wheel

BXR2100
21K Gross Towing Capacity,
5K Vertical Load Limit

BXR2410
24K Gross Towing Capacity,
6K Vertical Load Limit

Features

- Connects to 2-5/16" gooseneck ball or bed rails.
- Funnel shaped hitch head helps guide the kingpin into place, significantly reducing the risk of false hookups & trailer drops.
- Dual articulating head: front/back, side-to-side
- True 360° nesting of the kingpin.
- Lightweight, 2-piece design: 122 lbs total .
- Adjustable height: 17", 18", and 19".
- Tested to SAE J2638.

2" to 2-5/16" Clamshell Adapter Included with BXH10141, BXH12271, BXH10171, and BXH12241.

Shown with BX9001 Hitch Step

BX#
BXH10141 **Description**
4" D/R, 2" S, 10K

BX#
BXH10171 **Description**
7" D/R, 2"S, 10K

BX#
BXH12271 **Description**
7" D/R, 2-1/2" S12K

BX#
BXH12241 **Description**
4" D/R, 2-1/2" S, 12K

Features

- Pre-installed 2" ball.
- Adjustable in height for level towing.
- Included clamshell converts 2" ball to 2-5/16".
- Will not drag on the ground like dual ball mounts.
- All-steel construction.

Ball Mount Accessories

BX#	Features
BXH9001	Hitch Step for Adjustable Ball Mounts
BXH9000	Pintle Hitch Kit

Protective Equipment

Trim from 24" to 10-3/4"

Adjustable from 67-1/4" to 96-3/4"

Mud Flap System

BX#	Description
BX88439	Blue Ox Camper Leveler, Pair
BX88445	Camper Leveler Chock, Single

Features

- Forged Aluminum Hub & Arms.
- Stainless Sleeved Steel Rods.
- Stainless Steel & Zinc Nickel Hardware.
- 3/8" Thick, 24" X 24" Wide, Fiber Reinforced Mud Flaps
- Rock Screen Accessory Included

Accessories

BX#	Features
BX88429	Exhaust Outlet
BX88430	Rock Screen
BX 88431	Heat Shield
BX88436	Garage Hanger

Protective Equipment

KarGard

BX#	Description
BX88439	Blue Ox Camper Leveler, Pair
BX88445	Camper Leveler Chock, Single

Features

- Round spring bars flex for a controlled ride.
- Steel-on-steel friction minimizes sway.
- L-Brackets keep spring bars in place.
- Standard Tongue Weights Available: 600, 800 & 1200 (2-5/16" Ball).

ADVANCED PAINT TECHNOLOGY

Consistent and controlled application of both the e-coat and powder coat processes are performed by the TTX ACC's (Automated Conveyor Carriers) and a Nordson Encore Automatic Spray System.

Enhanced Corrosion Protection:

E-coating's ability to penetrate into hard-to-reach areas and provide a uniform coating makes it an excellent base for corrosion protection.

Powder coating, when applied on top of e-coating, further enhances this protection, offering superior resistance to salt spray and other corrosive elements.

Improved Durability:

Powder coating is known for its toughness and resistance to chipping, scratching, and abrasion, making it a durable top coat.

E-coating provides a solid, uniform base for the powder coat, ensuring that the top coat adheres well and remains durable over time.

Better Edge Protection

E-coat penetrates and coats sharp edges and corners more effectively than powder alone, reducing the risk of early coating failure due to edge corrosion.

Aesthetic Benefits:

The powder coat layer provides a smooth, attractive, and uniform finish. The combination of a smooth e-coating base and a powder coat finish provides a high-quality, professional look.

Environmentally Friendly:

E-coating and powder coating processes are generally more environmentally friendly than traditional liquid painting, with reduced waste and emissions.

Efficient coating usage:

Coating can be used for higher volume production runs and uses paint more efficiently than spray techniques, delivering a high-quality finish with almost zero waste.

Overspray from powder coating is reclaimed and reused, reducing waste.

Our Promise

At Blue Ox, we know that loyalty isn't just about building great products—it's about showing up for our customers in every way we can. That means offering more than top-notch towing gear. It means creating a full-service experience that people can count on—from expert support to hands-on learning and everything in between.

Our **Sales Team** is at the heart of it all. Spread across the country, they do more than represent our brand—they build real relationships. They're the ones out there connecting with customers, earning trust, and turning first-time buyers into lifelong partners.

Behind the scenes, our **Training Team** keeps everyone on the same page. Whether you're talking to someone in sales or customer support, you'll hear the same clear message about our products—thanks to consistent, hands-on training. And when something new drops, our team makes sure the whole field is up to speed fast, so they can help customers right away.

Customer Service is personal for us. Our Customer Care Team isn't just here to answer questions—they're here to make every interaction feel positive and easy. They're quick to respond, ready to help, and genuinely care about getting things right.

And then there's our **Rally Team**—the folks you'll see out on the road. From RV rallies to trade shows, they bring Blue Ox to life in person. It's our chance to meet you face to face, show off what's new, and make sure you leave with the support you need.

Every time we connect with someone, whether it's a customer, partner, or team member, we're listening. We take what we hear and use it to keep building better towing products. That mindset has been part of who we are for the last one hundred years, and will remain the same for the next hundred.

A handwritten signature in black ink that reads "Mike Hesse".
